pH-value:	Approx. 11,5
Coverage:	Approx. 70 m ² /litre
Shelf life:	2 years from date of production in unopened original container
Storage/transport:	The temperature must not fall below +5°C or exceed +25°C during storage and transport.
Safety:	Irritant. R36 – Irritating to eyes. S2 – Keep out of the reach of children. S46 – If swallowed, seek medical advice and show container of label. S60 – This material and its container must be disposed of as hazardous waste.
Disposal:	Wastes and emptied containers should be handled in accordance with local regulations.
Content:	>5% but <10% non-ionic surfactants, preservative agent (benzisothiazolinone), perfume
Sizes:	1 litre

Preparations

Remove loose dirt and grit from your floor. Ensure floor is in sound condition and that the floor seal is intact. Do not allow Polish Remover into open gaps in the floor, may cause permanent stain.

Dilute 1 litre concentrate with 5 litres of clean water in a bucket. Prepare a second bucket with only clean water.

Application

1. Apply the Polish Remover solution on a small section of the floor and let it dissolve the polish for approx.. 5 minutes.
2. Scrub the wetted section with a hard bristled brush or a scouring pad.
3. Wipe off the dissolved material with a mop from the bucket with clean water.
4. Continue working section by section until the whole floor has been treated. Replace the cleaning water frequently.
5. Once the polish has been removed, rinse the surface one more time using clean water.

Note: Use water restrictively on wooden floors. All traces of Bona Polish Remover must be removed before applying new coats of polish or refresher.
